

Reproduction

Across

- 5. Pollen is released from the _____.
- 6. requires only one parent, no genetic diversity
- 7. Form of asexual reproduction, the cells splits, DNA goes with each part
- 10. The direct growth in response to a stimulus
- 13. Plants get the food they need to grow and reproduce from the process of _____.
- 16. This part of the flower holds the anther

- 17. growth in a direction because of gravity

Down

- 1. Plant growth when responding to touch --like bending around an object
- 2. One way that plants have adapted so animals will transport their seeds to new places is by producing _____.
- 3. Requires two parents, results in genetic diversity
- 4. When an insect goes from one plant to the next--this shows that the plant is dependent on _____ for pollination.

- 8. Holds the plant in place and gets water from the ground
- 9. Holds the ovules
- 11. The _____ attracts insects to the flower.
- 12. If there were a decrease in pollinating insects this would/could result in the decrease availability of _____.
- 14. the life cycle of a plant begins with a _____
- 15. What is the part of the plant that is below the flower and holds it up?
