

Name: \_\_\_\_\_

Date: \_\_\_\_\_

## Research Method for Economics, II Year Economics, I Activity

### Across

4. \_\_\_\_\_ a Research Problem properly and clearly is a crucial part of Research study and must in no case should be accomplished in a hurry.

6. Research, some preliminary survey or \_\_\_\_\_ is desirable

8. In many social science researches a considerable portion of research is devoted for \_\_\_\_\_ making.

10. a researcher must discuss his problems with his colleagues and others who have enough of experience in the same area or in working on similar problems. This is known as \_\_\_\_\_ survey.

### Down

1. \_\_\_\_\_ means "translating and transforming the selected Research problem in to a scientifically researchable question".

2. Hypotheses are useful and guide the \_\_\_\_\_ in proper direction.

3. The use of hypothesis prevents a blind search and \_\_\_\_\_ gathering of data which may later prove irrelevant to the problem under study.

5. The researchers must find the problem and formulate it so that it becomes \_\_\_\_\_ research proposed for solution, a matter stated for examination.

7. The best way of understand the problem is to \_\_\_\_\_ it with those who first raised it in order to find out how the problem originally came out and with what objectives in view.

9. All the available literature concerning the problem at hand must necessarily be \_\_\_\_\_ and examined before a definition of research problem is given.
