

# Research Strategies

## Across

4. What group of people in an experiment are not exposed to the variable?
9. What is an inactive substance used to control variables?
10. What is a form of thinking that does not blindly accept arguments and conclusions?
11. What research method allows variables to be controlled and observes the effect?

12. What is a group of people you would like to know something about?

## Down

1. What group of people in an experiment are exposed to the variable?
2. What type of observation occurs in natural situations without manipulation?
3. What research technique follows the same group for long periods of time?

5. What research technique gathers information from groups of people about their behaviors and attitudes?

6. What is the research technique in which someone is studied in depth?

7. What is a prediction about the outcome of research?

8. What does it mean to repeat a research study?
