

Name: _____

Date: _____

Respiration

Across

2. A waste product of respiration
6. The sugar required for respiration
8. which two structures does the trachea lead to in the lungs?
9. Where in the cell do aerobic respiration happen?
10. This is NOT the same as respiration-it is the process that moves air in and out of lungs

Down

1. Type of respiration which yields more energy
3. _____ is needed for complete oxidation of glucose
4. Product of anaerobic respiration in muscle cells
5. In anaerobic respiration due to incomplete oxidation of glucose it leads to production of less _____
7. One of the products produced during anaerobic respiration in plants
