

Name: _____ Date: _____

Respiratory System

1. Above Larynx
 2. Air filled pockets in lungs
 3. Areolar layer
 4. Sweep debris trapped in mucus
 5. Passage for air when breathing heavily
 6. Covers larynx food and drink can not pass it
 7. Entry point of lung from bronchi
 8. Dilation of bronchial air ways
 9. Regulates smooth muscle
 10. Inflammation of Lobules
 11. The weight of air
 12. Point at which trachea divides into two tubes
 13. Connective tissues in the vocal folds
 14. Portion behind the nasal cavity
 15. Engulf small particles that go to the lungs
 16. Produces mucus that covers exposed surfaces
 17. Below the larynx
 18. Breathing that is always active
 19. The volume of air moved per breath
 20. Type of breathing dominated by diaphragm
- A. Hilum
 - B. Alveolar Macrophages
 - C. Epiglottis
 - D. Oral cavity
 - E. Autonomic control
 - F. Lamina propria
 - G. Atmospheric pressure
 - H. Bronchodilation
 - I. Tidal volume
 - J. Lower respiratory system
 - K. Cilia
 - L. Mucous Cells
 - M. Pneumonia
 - N. Diaphragmatic breathing
 - O. Inhalation
 - P. Carina
 - Q. Thyroid Cartilage
 - R. Alveoli
 - S. Nasopharynx
 - T. Upper respiratory
