

# Review - Geologic History and Canadian Landforms

## Across

2. Imprints of plants or animals found in rocks  
 5. Example of metallic mineral  
 8. A large area that has unique topography  
 9. Place where you find divergent plate boundary  
 11. Canadian "bread basket"

14. It was 12 000 metres high during the Precambrian era  
 15. Powerful wearing-down process  
 17. Name the landform region you live in

## Down

1. Force responsible for movement of plates  
 3. Type of landform

4. The inner most layer of Earth  
 6. Forms when magma cools  
 7. Oldest Canadian mountains  
 10. Significant event during the Cenozoic era  
 12. Supercontinent  
 13. Proposed theory of Continental Drift  
 16. Rocks are recycled in a processes called
