

Review of choice (2/2)

Across

- 2. The smallest particle of something that cannot be broken down
- 4. Reduction in volume that causes an increase in pressure
- 11. A group on the periodic table consisting of 5 elements
- 13. Electric current flowing in multiple directions
- 16. Doesn't allow passage of heat

17. A form of energy due to charged particles

Down

- 1. Equipment that reduces high voltage of high electricity
- 3. A place where power is generated and put out
- 5. Sharing of electrons to connect atoms
- 6. Network for delivering power

7. Electricity that flows in one direction

- 8. To break off because of strain
- 9. An atom with a charge due to loss or gain of an electron
- 10. Element that is between a metal and a nonmetal
- 12. Apply forces that stretch
- 14. Material that transmits heat
- 15. Exchange of electrons to connect atoms
