

Name: _____

Date: _____

River erosion

Across

- 2. The process of gradual wearing down of rock over time
- 3. The distance which wind has traveled to form a wave
- 4. Chemical action of the sea where salt water dissolves the rock
- 8. Type of wave that removes material from the beach
- 9. Water forced into a rock, squashing the air. This blasts out and breaks off rock when wave retreats

- 10. Rock fragments are picked up and thrown at the cliff by the sea

Down

- 1. Type of wave that helps build up material on a beach
- 5. When waves break up the beach
- 6. Smaller rocks carried within the sea knocks against each other, breaking down further
- 7. Water from waves runs back down the beach
