

# Rivers and Waterfalls

## Across

4. If a plunge pool is underneath what is on top?
5. What happens to the overhang when it can no longer support itself?
6. What is one of the things that the action of freeze-thaw does to rock?
8. The waterfall (something) upstream
9. As the river erodes downwards what are the sides of the valley exposed to?

10. When the waterfall retreats upstream what does it leave behind?

## Down

1. Which course do V-shaped valleys usually form in?
2. What is it called when rocks hit against the bank and the bed of the river?
3. What is the name given to the action 'the sheer force of the water'?
7. what happens to the channel when creating a V-shaped valley?
