

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Rock Cycle

## Across

5. A type of igneous rock that forms so quickly, it looks glass-like

7. The process of rocks changing from one form to another

9. Type of rock that is transformed by heat and pressure

11. Heat and \_\_\_\_\_ transform sedimentary rock into metamorphic rock

12. Type of rock formed from sediment

## Down

1. Sedimentary rock formed from weathering debris

2. Sedimentary rock formed from a solution (rainwater)

3. Igneous rock formed under Earth's surface

4. Type of rock formed from magma

6. Igneous rock formed on Earth's surface

8. The \_\_\_\_\_ of magma produces igneous rock

10. Sedimentary rock formed from plant and animal debris
