

Name: _____

Date: _____

Rocks

Across

- 2. The process by which sediment comes to rest.
- 6. This rock forms when high temperature and pressure change the texture and mineral content of rock.
- 11. Anything that has volume and mass.
- 13. Molten rock that has reached Earth's surface.
- 14. An area where a set of deep cracks form.

- 15. This rock forms from cooling lava and magma.

Down

- 1. The rising of regions of the crust to higher elevations.
- 3. The process by which sediment is moved from one place to another.
- 4. This rock is composed of minerals formed from solutions or sediments from older rock.
- 5. The sinking of regions of the crust to lower elevations.

- 7. A solid geometric form that results from a repeating pattern of atoms or molecules.
- 8. The process by which water, wind, ice, and changes in temperature break down rock.
- 9. The series of processes in which rock changes from one type to another.
- 10. Molten rock inside Earth.
- 12. A naturally occurring solid mixture of one or more minerals that may also include organic matter.
