

# Rocks And Minerals

## **Across**

**2.** what kind of rocks cool slowly?

**4.** \_\_\_\_\_ is a feature of a metamorphic rock

**6.** a \_\_\_\_\_ is made up of protons (p) and neutrons (n) in the center with electrons (e-) orbiting it

**9.** what type of rock is schist

**11.** the softest mineral is:

**12.** when metamorphosed, limestone becomes

**13.** oxygen and aluminum make up how much of the earth's crust

**14.** what forms crystals?

**15.** extrusive rocks have a \_\_\_\_\_ texture

## **Down**

**1.** what type of rock is basalt

**3.** igneous form by:

**5.** when different atoms join together they make a:

**7.** examples: granite, sandstone, marble

**8.** limestone is a type of \_\_\_\_\_ rock

**10.** \_\_\_\_\_ taste like salt
