# SCIENCE

## **Across**

- 3.** When plates move side to side next to each other, what type of boundary is formed?
- 8.** What type of boundary is formed when the plates collided?
- 9.** This crust is less dense than the Oceanic crust?
- 10.** What is the name of the once "supercontinent"?

- 11.** This is a process that causes the continents to move 1 inch per year
- 12.** What are pieces of the lithosphere that move around on top of the mantle called?
- 13.** When the plates move apart what type of boundary is formed?

## **Down**

- 1.** These occur at transform boundaries
- 2.** What is the reason tectonic plates move?
- 4.** These form at divergent boundaries
- 5.** Who came up with the Theory of Continental Drift?
- 6.** What is the gradual movement of the continents/plate tectonics?
- 7.** Which crust is denser? Oceanic or Continental?
