

Name: _____

Date: _____

SCIENCE PROJECT

Across

2. is the second planet from the Sun, orbiting it every 224.7 Earth days

3. minor planets, especially of the inner Solar System.

6. a description of the Universe with Earth at the center

8. an icy, small Solar System body that, when passing close to the Sun, warms and begins to release gases, a process called outgassing

9. is the sixth planet from the Sun and the second-largest in the Solar System

10. is a small rocky or metallic body in outer space

Down

1. is the astronomical model in which the Earth and planets revolve around the Sun at the center of the Solar System

4. is the gravitationally bound planetary system of the Sun and the objects that orbit it, either directly or indirectly

5. is an astronomical body orbiting a star or stellar remnant that is massive enough to be rounded by its own gravity

7. is the third planet from the Sun and the only astronomical object known to harbor life
