

# Sci-Fi Project

## **Across**

**3.** Concern with events and trends of the future or which anticipate the future.

**5.** A being that looks like us but on a different planet.

**8.** Space beyond the Earth's gravitational influence or beyond the orbit of the Moon.

**9.** An impossible situation created by traveling back through time, for example, when a man travels back and kills his father, so that he himself could never exist.

**10.** Very short electromagnetic waves usually produced by radioactive disintegration.

**11.** A narrow, intense beam of light usually used as a weapon.

## **Down**

**1.** An invisible barrier of exerted strength or impetus.

**2.** The idea of creating a place or object that is free from the force of gravity.

**4.** A space-time continuum in which it is possible to travel faster than light.

**6.** A \_\_\_\_\_ shield is an enclosure used to block electromagnetic fields.

**7.** Streams of high-velocity Helium nuclei, composed of two protons (alpha particles) emitted from radioactive elements.
