

Science 10 - Biology

Across

3. a _____, is an animal or person that eats food of both plant and animal origin.

6. _____ are the physical and chemical components in the earth

7. A _____, is an animal that is hunted and killed by another for food.

12. a system of interlocking and interdependent food chains.

13. _____ are the elements and compounds that organisms must have to live and grow

16. _____ the natural home or environment of an animal, plant, or other organism.

17. _____ is the study of how organisms interact with each other and with their physical environment

19. _____ is the type of balance, where there is continuous change but the overall system remains stable

21. _____, is symbiosis that is beneficial to both organisms involved.

22. A _____, is a meat eater

23. an _____ is a organism that is able to form nutritional organic substances from simple inorganic substances such as carbon dioxide.

24. _____ is an individual animal, plant, or single-celled life form

25. _____, is symbiosis that is beneficial to both organisms involved.

Down

1. _____ is the living components of the ecosystem

2. A _____ is a biological community of interacting organisms and their physical environment.

4. A _____ is the regions of the surface, Atmosphere and Hydrosphere

5. _____ is the most critical factor in determining the types of organisms that can exist in an ecosystem

8. A _____ is an organism that lives in or on another organism (its host) and benefits by deriving nutrients at the host's expense.

9. A _____ is an animal or plant on or in which a parasite or commensal organism lives.

10. organisms that consume other organisms or biotic waste in order to survive are called _____

11. A _____, is an animal that naturally preys on others.

14. A _____ is an animal that feeds on plants.

15. A _____ has the ability to make foods from inorganic materials and a source of energy from the sun

18. A _____ is a group of people living in the same area or having a similar characteristic in common

20. A _____ is a plankton consisting of small animals and the immature stages of larger animals.
