

# Science Organelles

**Across**

- 2. Center of the nucleus where ribosomes are made
- 9. Cell jelly that gives the cell shape
- 10. A passage way to transport risosomes
- 12. Strands of heroditary material inside the nucleus
- 13. Sorts and packages protiens

- 14. The tough outer layer that gives extra support
- 15. Makes protiens
- 16. Photosynthesis to support sugar

**Down**

- 1. The control center
- 3. Smallest unit of living things
- 4. Specialized structures inside the cell

- 5. Nutrient and water storage
- 6. The power house
- 7. The part that surrounds the cytoplasm
- 8. Genetic material inside the nucleus
- 11. Digestive enzymes and collects waste
