

# Science Project

## Across

- 4.** The way prey and predators are laid out in order  
**6.** The number of people living in each unit of area  
**8.** Where things live  
**10.** The way an ecosystem is laid out by prey  
**12.** A biological community of interacting organisms and their physical environment

- 14.** A organisms job  
**15.** A group of people living in the same place or having a particular characteristic in common

## Down

- 1.** The factor that changes the food chain  
**2.** The amount of organisms  
**3.** Living Things  
**5.** Non Living Thing

- 7.** What does the water we drink go through?

- 9.** The regions of the surface, atmosphere, and hydrosphere of the earth

- 11.** interaction between two different organisms living in close physical association

- 13.** The study of living things

## Word Bank

- |                    |           |                 |           |
|--------------------|-----------|-----------------|-----------|
| Populations        | Food Web  | Abiotic Factor  | Community |
| Population Density | Niche     | Limiting factor | Ecosystem |
| food chain         | Ecology   | Biotic Factor   | Biosphere |
| Habitat            | Symbiosis | Water Cycle     |           |
