

Science Project

Across

- 2. The mitochondria is where this occurs?
- 8. What are the structures called that support and give plant cells their shape?
- 9. This organelle packages and distributes different substances throughout the cell?
- 11. This is only found in animal cells?

- 12. This organelle is inside the nucleus?
- 13. No ribosomes are attached to this organelle?
- 14. What kind of cell does not have a chloroplast?
- 15. Which organelle is the brain of the cell?

Down

- 1. Ribosomes are attached to this?
- 3. What is the type of cell that humans are made of?
- 4. What organelle manufactures proteins?
- 5. The site of photosynthesis?
- 6. What is the power house of the cell?
- 7. What is the jelly-like fluid in a cell?
- 10. What are called the suicide sacks?
