

# Science Project

**Across**

- 1. This organelle packages and distributes different substances throughout the cell?
- 2. What are the structures called that support and give plant cells their shape?
- 6. Which organelle is the brain of the cell?
- 7. What is the jelly-like fluid in a cell?

- 10. No ribosomes are attached to this organelle?
- 13. What is the power house of the cell?
- 14. What are called the suicide sacks?
- 15. These are only found in animal cells?

**Down**

- 3. What organelle manufactures proteins?
- 4. The mitochondria is where this occurs?

- 5. What are the type of cells that humans are made of?
- 8. The site of photosynthesis?
- 9. What kind of cell does not have a chloroplast?
- 11. This organelle is inside the nucleus?
- 12. Ribosomes are attached to this organelle and gives it texture?
