

# Science Test Review

**Across**

- 4. Step-by-step instructions for completing a task
- 8. Something that can change in a test
- 9. A set of observations that make you believe that something is true
- 10. Standard against which change is measured
- 11. What do you think will happen during an investigation

**Down**

- 1. Scientific methods to test your hypothesis
- 2. A conclusion based on observations
- 3. Ability to consistently repeat a measurement
- 5. Information from which a conclusion can be drawn
- 6. Ability to make a measurement that is close to the actual value as possible
- 7. Something you find out about objects, events, or living things by using your senses

**Word Bank**

- |               |           |            |            |
|---------------|-----------|------------|------------|
| Control group | Inference | Evidence   | Procedures |
| Experiment    | Accuracy  | Data       | Variable   |
| Observation   | Precision | Hypothesis |            |
