

Science Theme

Across

- 2.** What matter occurs in all three states
- 7.** The air section of earth
- 8.** Where two air masses meet
- 9.** Appears at a front
- 15.** Heat energy is also called
- 18.** Destroys organisms and recycle nutrients
- 19.** Two or more things that cannot be separated
- 20.** Sound cannot travel through
- 21.** What has mass and take up space
- 23.** Water vapor coming from plants

- 24.** Organisms that make there own food

- 26.** The top of a wave
- 28.** Objects that work together to help with daily functions
- 30.** The first step in the water cycle

Down

- 1.** The building block of all living things
- 3.** The planet we live on
- 4.** The energy shown when we eat food
- 5.** The control center of a organism
- 6.** Organisms that only eat meat

- 10.** The part of earth we live on
- 11.** The water part of earth
- 12.** Fourth state of matter
- 13.** An object at its highest point
- 14.** A substance that cannot be broken down anymore
- 16.** The ability to cause change
- 17.** Air pressure is measured
- 22.** The thing that gives plants it's green color
- 25.** The control center of a cell
- 27.** No define shape or volume
- 29.** Has definite shape and volume
