# Science Unit 1 Review

1. What is sediment?
  2. What is a gemstone?
  3. What is a man made gem?
  4. What is igneous rock?
  5. What is sedimentary rock?
  6. What is metamorphic rock?
  7. What is a fossil?
  8. What is a mold?
  9. What is Creationism?
  10. What is Evolution?
  11. What is a paleontology?
  12. What is carbon dating?
  13. What does a Stegosaurus have?
  14. What does a Spinosaur have?
  15. What is a Sauropod?
  16. What is extinction?
  17. What is the Core of the Earth?
  18. What is the Mantle of the Earth?
  19. What is the Crust of Earth?
  20. What is magma?
  21. What is weathering?
  22. What is erosion?
  23. What is soil?
  24. What is humus?
  25. What is a mineral?
- A. largest creature on earth
  - B. bony spikes
  - C. the last of it dies off
  - D. a living organism preserved
  - E. formed by heat and pressure
  - F. small bits of weathered rock
  - G. imprint of organism in rock
  - H. the middle of earth
  - I. the center
  - J. organic parts of of soil
  - K. God creating the world
  - L. orderly particle arrangement
  - M. plate like armor
  - N. the outer layer of earth
  - O. inorganic substance
  - P. hardened layers of sediment
  - Q. volcanic magma or lava
  - R. measures carbon 14
  - S. moving sediment
  - T. loose material on surface
  - U. synthetic
  - V. wearing away of earth
  - W. the study of fossils
  - X. hot, melted rock
  - Y. a mineral cut and polished

26. What is a crystal?

Z. universe created by chance
