

Name: _____

Science Vocab

Across

- 2. A large concentration of solute
- 4. Cell drinking - engulfing liquids like water
- 8. Moving water from an area of high concentration of water to an area with low concentration of water
- 9. Cell membrane wraps around something, taking the item into the cell and forming a vacuole around it

10. A low concentration of solute

11. Materials can pass through

12. Moving materials through the membrane without using energy

13. Materials cannot pass through

Down

1. Cell eating - engulfing food or solid particles

3. Movement across a membrane using energy

5. Arrangement where neighboring solutions have the same concentration of solute and are in a state of equilibrium

6. Some materials can pass through

7. Moving anything from high concentration to low concentration
