

# Science and Minerals

**Across**

- 2. Softest mineral
- 3. Breaks into a long flat surface
- 5. Hardest mineral
- 8. 2nd layer to top

- 11. 1,400 miles thick
- 12. Breaks into irregular surfaces

**Down**

- 1. Slow Cooling: \_\_\_\_\_ crystal
- 4. Fast Cooling: \_\_\_\_\_ crystal
- 6. 760 miles thick
- 7. Mass divided by Volume
- 9. Made of different types of minerals
- 10. Definite shape and volume
