

Science chapters 3 & 4

Across

- 9.** thick part of Earth's crust the forms landmasses
11. plates slip past eachother
13. a mountain, having a crater through which lava can get out
16. upper layers of Earth's mantle, convection currents occur
18. second largest ocean, east coastline of Florida
19. violent shaking of Earth's surface/ground
20. the continent we live on

Down

- 1.** when the edge of a plate goes under another one of Earth's plates
2. more together
3. plates move apart from eachother
4. breaks in Earth's crust where rocks have slipped past eachother
5. theory that parts of Earth's lithosphere is in constant movement
6. landform that rises above land
7. plates come together

8. scientists that had the idea of Pangea

10. changing physical location

12. where pieces of Earth's crust diverge on land; a deep valley

14. low temperature

15. high temperature

17. thin part of Earth's crust that underlines the ocean basins
