

Name: \_\_\_\_\_

# Science vocab

## Across

3. Atoms arranged in a geometric pattern

6. Made up of all the same types of Atoms

9. A change in the physical form like solid to gas to liquid

10. Smallest thing in the universe

12. The bonding of two or more atoms

14. Joining of two or more elements

15. Makes up everything

16. Orbits the nucleus of an atom, negative charge

## Down

1. The result of combining two different Atom

2. A change to a new substance

4. What temperature when a solid starts to melt

5. The temperature when a liquid starts to boil

7. One of the atoms bonded to another Atom in a chemical reaction

8. Part of a nuclear us of an Atom, no charge

11. Joining of atoms

13. Part of the nuclear us of the Atom,, positive charge
