

# Scientific Inquiry

## Across

1. Type of experiment in which all but one of the variables remain the same.  
 7. A detailed series of steps to follow to perform an experiment.  
 10. The first step of the Scientific Inquiry.  
 11. Examining carefully and recording data in table form.  
 12. A variable that is kept the same throughout the experiment and is mainly used as a comparison.

13. The variable that depends on other factors and will be measured and/or affected in the experiment.  
 14. Type of observation that is descriptive such as colour, texture, size etc.

## Down

2. The process used by scientists to solve problems.  
 3. The variable that the experimenter changes in an experiment.

4. Visual aids used by scientists to communicate the results of an experiment.  
 5. Type of observation that is a measurement and can be recorded in tables, such as volume, density, temperature etc.  
 6. A list of all the utensils used in the experiment.  
 8. Summarizing the results of an experiment.  
 9. An educated guess predicting the results of the experiment.
