

# Scientific Method

## Across

7. Defining the issue of the experiment is known as identifying the \_\_\_\_\_.

10. \_\_\_\_\_ is the response to the independent variable.

## Down

1. What is the variable that never changes and always remain the same?

2. What the variable that is changed on purpose?

3. What is the variable that remains unchanged?

4. What is the process for studying and experimenting, to help reach conclusions

5. An \_\_\_\_\_ is the process of comparing variables to find out an outcome

6. What is an educated guess?

8. The summary of the results from the experiment is known as \_\_\_\_\_.

9. reviewing the information collected during the experiment
