

# Section 1 Vocab - Reproduction System

## Across

3. Outpouching of the abdominal wall containing the testes  
 7. Production of sperm  
 8. secretes an alkaline fluid that is part of the semen  
 11. External median ridge of the scrotum  
 16. Mature sperm cells  
 19. Produce secretions that supply nutrients for developing sperm cells  
 20. Network of ducts in the testis  
 21. Immature sperm cells  
 25. Tightly coiled tubules in each lobule of a testis  
 26. A layer of white, fibrous, connective tissue that covers each testis  
 27. Contains enzymes that aid the sperm cell in penetrating the ovum

28. Secondary spermatocytes that undergo the second meiotic division  
 29. Produced by the first meiotic division of the primary spermatocytes

## Down

1. Produced by mitotic division of immature sperm cells  
 2. A single tube in the testis into which the coiled efferent ducts empty  
 4. Primary sex organs of the male reproduction system that produce sperm and male sex hormones  
 5. Ejects spermatozoa into the urethra  
 6. Produce testosterone  
 9. Connective tissue sheath enclosing the vas deferens  
 10. Produce an alkaline mucus

12. Muscle in the spermatic cord that elevates the testes  
 13. Produce an alkaline  
 14. Principal male sex hormone  
 15. Series of coiled tubes that transfer the sperm out of the testes  
 17. Located at the tip of each lobule of a testis  
 18. Mixture of sperm cells and secretions  
 22. Tube that leads from the bladder to the outside  
 23. Male reproductive organ  
 24. Swelling and hardening of the penis due to retained entry blood
