# Similarity of Different Places

## Across

- 3. The physical gap between two things/the distribution of features
- 4. Spreading across a given space
- 6. How close together things are in a given area (different than density)
- 8. More countries becoming interdependent and working together, the world growing "closer together"

9. Frequency (how often something occurs) in a given space

12. The farther away from something the else likely it is to affect you

13. the movement of people, goods and ideas within and across geographic space

14. Amount of people per unit of ARABLE land

## Down

1. the reduction in the time it takes to diffuse something, a result of improved communications

2. A company that operates in multiple countries

5. Amount of farmers per unit of land

7. Amount of people per unit of land

10. The place from where things diffuse from

11. The geometric arrangement of something in a given space
