

Skeletal System

Across

5. The medial longitudinal arch runs along what side of the foot
 6. Growth in width
 10. Cell that deposits bone
 12. Zone of actively dividing cartilage cells
 14. What gender has a smaller pelvic outlet?
 15. Type of bone that resists stress from multiple directions
 16. Hematopoiesis is production of what
 17. Hormone released in response to low blood calcium levels

18. Force that promotes bone resorption

22. Movement away from midline
 23. Bones formed via intramembranous ossification
 25. Connects muscle to bone
 26. Ribs 8-12 are called what

Down

1. Last step in epiphyseal plate growth
 2. Hormone that increases bone deposition
 3. Movement around one axis
 4. What type of joint is held together by dense regular collagenous tissue

7. Intervertebral discs are made of what cartilage

8. What type of cartilage found on the end of bones reduces friction?

9. Bone located within tendon
 11. Cartilage used as model for endochondral ossification
 13. Functional joint classification with greatest mobility
 19. Fibrous joints found between bones of the skull
 20. Structure of the elbow joint
 21. Thin, broad bones
 24. Thoracic and sacral curves are what shape?
