

Skeletal System 2

Across

- 3.** tiny canals
4. a blood filled swelling
5. giant bone-destroying cells in bone; break down bone matrix
11. formed by two sets of bone
13. arranges lacunae in concentric circles
16. arranges lacunae in centric circles (haversian canals)
18. a break in bone
20. a canal that leads to the eardrum and the middle ear
22. sharp, needlelike projection is just inferior to the external acoustic meatus

- 23.** holds the eyes in anterior positions

24. complex consisting of central canal and matrix rings (haversian system)

- 25.** bone forming cells

Down

- 1.** paired; form most of the superior and lateral walls of the cranium
2. inferior to the parietal bone
6. connective tissue cells of various type form a mass of repair tissue
7. thin bridge of the bone that joins with the cheekbone

- 8.** process of bone formation

- 9.** forms the forehead

10. communication canal from the outside to inside bone (volkmann's)

- 12.** joins temporal bones

- 14.** midline of the skull

15. forms the ___ where they meet the frontal bone

17. treats fractures; realigns broken bones

19. composed of eight large flat bones

21. replaces fibrocartilage callous
