

Slope

Across

- 2. numbers can be negative and
- 3. line is one which runs from left to right across
- 6. 1. secondary or vertical axis of a system of coordinates
- 8. number that is less than zero
- 10. take an inclined or oblique direction or angle considered with reference to a vertical or horizontal plane

- 11. a diagram showing the relationships between two or more things.

- 14. used to find slope
- 15. usually horizontal
- 17. a line that goes up and down a graph is know as
- 18. runs up and down

Down

- 1. a line that goes across the graph is know as
- 4. a line is the point

- 5. the point where a line intersects
- 7. the equation of a straight line
- 9. plotting points, lines and curves on an x and y axis
- 12. show where the point is positioned
- 13. lean or turn away from a given plane or direction
- 16. exact position or location on a plane surface
