

Solar System

Across

- 1. Coldest planet in our Solar System
- 3. Coldest planet in our Solar System
- 8. has low density and the planet is made of hydrogen and oxygen
- 9. A Galaxy the Sun and the 8 planets are in
- 11. an object going around another object
- 12. Center of our Solar System

16. happens when the moon's shadow appears on Earth's surface

- 18. Has 7 groups of rings around it
- 19. An imaginary line through a planet
- 20. Smallest planet in our Solar System

Down

- 2. Has the, " Great red spot"
- 4. A small planet lacking criteria to be classed as a regular planet

5. A path a planet goes around

- 6. happens when the moon moves in Earth's shadow
- 7. Has a reddish color to it
- 10. The hottest planet in our solar system
- 13. Goes through different phases
- 14. some people call this planet the, "ice giant"
- 15. A planet spinning around its own axis
- 17. Only planet with living organisms
