

Solutions Vocabulary

Across

5. A homogeneous mixture of two or more substances uniformly dispersed throughout a single phase
 7. A substance that dissolves in water and can conduct electricity
 8. Dissolving medium in a solution

10. A solution that contains the maximum amount of dissolved solute
 11. Amount of substance required to form a saturated solution

12. Liquids not soluble with each other

Down

1. liquids that dissolve freely with one another

2. A substance that contains less solute than a saturated solution
 3. A solution that contains more dissolved solute than a saturated solution
 4. A substance that dissolves in water and does not conduct electricity
 6. Capable of being dissolved
 9. Substance being dissolved in a solution
