# Solve the mathematical terms

## Across

- 6. When a survey results does not reflect the population.
- 8. The amount of money in an account or the amount owed on a credit card.
- 10. The value of an asset at a specific date.
- 12. Data that are distinct (no decimals) ex. number of siblings
- 13. How far a vehicle will travel per unit of fuel is based on?
- 14. simple interest is an example of what?

- 15. A group of individuals or items that are representative of the population from which they are taken

## Down

- 1. The best way to save money and make more is by using?
- 2. what is the formula called that asks you to figure out the measurements of the side and angles of a triangle?
- 3. When using trigonometry to measure what looking up is we use?

- 4. The zeros of a quadratic relation are also called?
- 5. The sample contains those members of the population from which data are most easily collected
- 7. What is the term called for payments that are reported twice a year?
- 9. When you are given a matching pair (corresponding angle and side) you use?
- 11. The axis of symmetry of a parabola is a vertical line through the?
