

Solving Equations

Across

- 4.** To find the value of the variable to make the equation true.
- 8.** A mathematical process.
- 9.** A mathematical sentence that shows two expressions are equal.
- 10.** A symbol that represents an unknown number/value.

Down

- 1.** What are equations with variables on both sides?

- 2.** The action or process of adding two values together.
- 3.** The number before the variable or expression that is multiplied by the variable or expression.
- 5.** To find the value of an algebraic expression by substituting a number for a variable.
- 6.** A part or term of an equation or expression that exists without a variable.
- 7.** Part(s) of an equation or expression consisting of coefficients, variables and constants.
