

# Solving Systems by Graphing

**Across**

- 2. What is the first thing you should plot when graphing an equation?
- 8. What form should your equations be in?
- 9. A solution to a system makes both equations \_\_\_
- 10. What is an answer to a system called?

**Down**

- 1. What is another way of saying slope?

- 3. Where your two lines cross on the coordinate plane, is called the\_\_\_
- 4. One way to check to see if your solution is correct is by \_\_\_\_\_ in your solution
- 5. The easiest way of checking a solution to a system, is by plugging it into your\_\_\_
- 6. A solution of a system of linear equations with two variables is an \_\_\_\_\_
- 7. After graphing your y-intercept, what is the next thing you should graph?
