

Speciation and Macroevolution

Across

3. fatherland
 7. an evolutionary biologist
 11. difference in their appearance
 12. isolation when different animals meet
 15. first cell
 18. splitting of one species
 20. species of plants hybridize
 21. documented in plants
 22. common ancestor

24. physical characteristic
 25. evolution on a large scale

Down

1. inviability when an animal die
 2. isolation with courtship patterns
 4. the opposite of analogous
 5. isolation between two different species
 6. reproductive isolation
 8. absence of geographic barrier

9. isolation when animals are incompatible
 10. isolated species in the same location
 13. diploid plant produces
 14. mating between two species
 16. classifies organisms
 17. evolve convergently
 19. look almost identical
 23. genes found in all animals
