

Species & taxonomy

Across

4. Single celled group of prokaryotes with a cell wall (when present) containing no murein and a complex form of RNA
7. Group of organisms made up of eukaryotic
9. The type of classification divides organisms according to differences in

11. Single celled group of prokaryotes containing small ribosomes, a murein cell wall & single loop of

13. This type of behaviour helps offspring have the maximum chance of

14. Naming species is based on this

Down

1. Largest group in the eukarya
2. The highest taxonomic

3. The type of classification based on evolutionary

5. Grouping of organisms is known as

6. The study of groups in in the type of classification based on evolutionary

8. Smallest group in the eukarya

10. First name when naming species is the _____

12. Second name when naming species is the _____
