

Sustainability and Green Design

Across

- 2. Used in life cycle assessment
- 8. April 22nd
- 14. Energy Conservation Measures
- 15. Using a product more than once
- 16. Occupational and Health Safety Administration
- 17. Item can be reused in the condition it is in
- 20. Final placement of toxic waste
- 22. Heating, ventilation, and air conditioning
- 23. Oxygen depletion in water
- 25. Air Changes per Hour
- 26. Geographic Information System

- 27. Time and resource needed for materials

- 28. Disposal sites for waste

Down

- 1. Protective layer in the atmosphere
- 3. Repelling water
- 4. Environmentally sound building uses
- 5. The material is reworked
- 6. Decomposition by extreme heat
- 7. Waste material can be decomposed
- 9. Attracting water
- 10. Rise in temperature due to greenhouse gases
- 11. Materials are reused for a new purpose

- 12. Indoor Air Quality

- 13. Air, water, and sound

- 18. Air from the outside is brought inside

- 19. Sustainable Sites category

- 21. Life Cycle Assessment

- 24. American National Standards Institute

Word Bank

Reuse	Sustainable	Recycling	LCA	Adaptability	OSHA
Remanufactured	Ozone	Biodegradable	Ventilation	GIS	ANSI
Disposal	Hydrophobic	Cradle to Cradle	ECM	HVAC	Green Design
IAQ	Global Warming	SS	Landfills	Earth Day	ACH
Pollution	Hydrophilic	Pyrolysis	Eutrophication
