

Symbiotic Relationships

Across

2. A group of interacting populations of organisms
 6. A symbiotic relationship in which both organisms benefit
 9. Interactions that benefit the populations
 10. an ecological interaction between two organisms
 11. A symbiotic relationship in which one organism benefits and the other organism is harmed

12. microorganisms that constantly live inside or on the human body

13. microorganisms that are only temporarily found in the human body

Down

1. One population competes with another population for resources to survive
 3. A symbiotic relationship in which one population is harmed and the other population is unaffected

4. A symbiotic relationship in which one population benefits and the other population neither benefits nor is harmed

5. A symbiotic relationship in which both populations are unharmed and not benefiting

7. all prokaryotic and eukaryotic microorganisms that are associated with a certain organism or environment

8. Study of interactions between microbial populations and their environment
