

Systemic Pathogens

Across

2. Main cause of AIDS death
 6. Natural Host of B. anthracis
 8. Means Good for Nothing
 12. Ability to grow at refrigerator temperatures
 15. Anthrax form resulting when spores enter lungs
 16. Host where Plasmodium undergoes sexual reproduction
 17. Infective stage of Malaria
 18. Target cell of Lethal Toxin
 19. Propells Listeria within and between cells

20. Enzyme that transcribes RNA to DNA

Down

1. Helps cDNA of HIV to enter host chromosome
 3. First microbe proven to cause disease
 4. Academy Award Winning Film about HIV-starring Tom Hanks
 5. Toxin component that binds target cells
 7. Antigen important in Malaria entry to RBC-missing in some people

9. Global regulation of Listeria virulence genes
 10. Co-receptor for HIV on macrophages
 11. Protein facilitates of up-take of Listeria into non-phagocytic cells
 13. Hemolysin produced by the bacterium Listeria monocytogenes
 14. Number of people cured of HIV
