

Systems of Equations

Across

3. System of Linear Equations is a set of two or more linear equations containing two or more _____

4. An equation that when graphed will form a line

6. A method for solving a system of linear equations when the expression of a variable is substituted for a variable in an other equation

7. Shown as (x, y)

8. The two lines are graphed on top of each other

9. When 2 lines never cross

10. The method of solving a system in which two equations are added together, where one of the two variables will be eliminated

Down

1. A visual display of (x,y)

2. $Y=my=b$

5. a single point where two or more lines meet or cross each other
