

# Systems of Equations

## **Across**

- 6.** graphing 2 or more linear equations to determine the solution to the system
- 7.** two or more related linear equations
- 8.** one equation is solved for one variable and that solution is substituted into the second equation
- 9.** Rules describing the sequence to use in evaluating expressions
- 10.** a statement that two mathematical expressions are equal

## **Down**

- 1.** any value for a variable that makes an equation or inequality true
- 2.** A branch of mathematics that includes the use of variables to express rules about numbers, numbers relationships and operations
- 3.** a pair of numbers that give the coordinate of a point on a grid in this order: (horizontal x, Vertical y)
- 4.** in a system of linear equation this means the collinear
- 5.** a group of numbers, symbols and variables that express an operation
