

TECHNO HUNT

Across

3. Current is considered to be the movement of _____.
4. A unit of charge that contains 6.25×10^{18} electrons
6. A voltmeter is used in _____ with the circuit.
7. An atom's atomic number is determined by its number of _____.
9. The part of an atom that has no electric charge

12. A substance that is found only in its pure form

14. A diagram that shows the electrical connections of the electronic components

15. A flow of electric charge.

Down

1. A characteristic of a secondary cell.

2. A material that opposes the movement of free electrons

5. One coulomb passing a point in one second.

8. A resistive component that is designed to be temperature sensitive.

10. A device that opens or completes an electrical path

11. The term used to designate electrical pressure

13. A short circuit will have a _____ current flow
