

# TUTORIAL 4 - NEOPLASIA

**Across**

- 2. one of the metastasis route for the cancer cells
- 3. description of how abnormal the tumor cells looks like
- 6. benign form of fat tissue tumor
- 10. the most common occupational cancer
- 11. molecular events of neoplasia

- 12. tissue \_\_\_\_\_ is direct migration & penetration of the cancer cells into neighbouring tissue

- 13. mutant form of proto oncogenes
- 14. one of the local effect in neoplasia

**Down**

- 1. A syndrome in cancer that was presented with symptoms distant from the primary lesion

- 4. one of the carcinogenesis theories
- 5. poorly differentiated cells
- 7. demonstration of phenotypic features of malignancy occurs in \_\_\_\_\_ phase.
- 8. progressive loss of body fat
- 9. food preparation is categorized as cancer \_\_\_\_\_
