

# Taxonomy

## Across

2. Kingdom of heterotrophic eukaryotes that have spores and chitin cell walls  
 4. Humans belong to which Class?  
 5. Kingdom of unicellular organisms that are prokaryotes but have some characteristics with eukaryotes  
 10. Kingdom of single-celled & simple celled eukaryotic organisms  
 11. Humans belong to which Family?

14. Humans belong to which Genus?  
 15. Kingdom of autotrophs  
 16. Kingdom that does NOT contain prokaryotes.  
 17. How many Kingdoms are there?  
 18. Kingdom of prokaryotes that lack a membrane and can be classified by shape

## Down

1. Prokaryote cell referred to as "True Bacteria"  
 3. What is the tool used to sort organisms by paired similarities?

6. unicellular microorganisms that are different from all other organisms and considered an ancient form of life  
 7. Branch of Science that names and classifies organisms  
 8. the 2nd highest level on the taxonomic hierarchy  
 9. Humans belong to which Order?  
 12. Humans belong to which Phylum?  
 13. How many Domains are there?
