

Taxonomy

Across

- 5. An animal with no backbone
- 8. One-celled organism often found in hot springs, or salt water environments.
- 9. A vascular plant with flowers that produces seeds and fruit.
- 10. One-celled living things found in or on other organisms. They come in rod, round or spiral shapes.
- 14. I have scales and lungs. I am cold blooded. I live mostly on land. I lay soft shell eggs.
- 15. I have feathers, wings, and a beak. I lay hard shell eggs.
- 16. The science of defining and naming groups of biological organisms on the basis of shared characteristics.
- 17. A multi-cellular organism that gets energy from eating other living things.

- 18. I have an unsegmented soft body. I have a shell and a muscular foot.
- 19. I have gills and scales. I am cold-blooded. I live in the water.
- 20. I have jointed legs, a segmented body, and an external skeleton. I live mostly on land.
- 22. I live in the water. I have an unsegmented simple body with tentacles.
- 23. The organizing of items into groups based on common characteristics.

Down

- 1. A group of living organisms that can make their own food
- 2. A type of plat with special tubes that carry food and water to all parts.
- 3. Living things that do not fit inot any other kingdom.

- 4. A vascular plant that produces seeds, but no flower or fruit.
- 6. Animals with backbones that surround the spinal cord.
- 7. I have skin, hair, and lungs. I can produce milk. I am warm blooded. I live on land.
- 11. I start out with gills and live in water. When I grow up I have lungs and live on land. I lay jelly eggs. I am cold-blooded.
- 12. Multi-cellular organism that cannot make its own food, as plants can. It absorbs food from dead organisms in its surroundings.
- 13. A group of non-vascular plants with no roots, seeds, or spores.
- 21. I have a simple tubular body. I may be segmented. I am asexual.
- 24. A plant with no flowers and reproduces via spores.
